THE GREAT AMERICAN ECLIPSE

After much anticipation, the Great American Eclipse finally arrived! All throughout the country people were gathering to look at this amazing spectacle in the sky. People were traveling from all over to areas where a total eclipse would be seen. What an amazing sight that must have been!

In West Virginia, we didn't get to experience the total eclipse. Depending on location, we may have seen around 85 to 90 percent coverage. I have seen pictures that people have taken, but I didn't get to personally see the eclipse. I didn't have the proper eye protection to view it.

If you were like me and didn't get to view the eclipse, you may have felt a bit disappointed in the show. Even at the peak of coverage it remained bright outside. It may have been a little bit darker, but still even brighter than a cloudy day. My first thought was, "Wow! What a disappointment!"

If you felt disappointed like me, let me share a FaceBook post from a guy that experienced the same thing in Alabama. I hope this blesses your day!

Love you all, Stephen

Okay, I admit I was a little disappointed in the eclipse, specifically how dark it didn't get. Until, that is, I realized the flip side. 93.5% of the sun was blocked where we are, yet the remaining 6.5% of sunlight made all the difference in the world, literally. It was still daylight outside, even though under 10% of the sun's energy was making it through.

The bottom line? Light wins, EVERY time.

Be light in this dark world. Be positive. Look for and point out the good. Don't join the throngs pointing out the bad. If you do, God can use your little bit of light to make a world of difference where it's needed the most.

In Him was life, and that life was the light of all mankind. The light shines in the darkness, and the darkness has not overcome it. John 1:4-5
